**Why a National Fuel Diversion Registry? -** Improperly manifested shipments increase marketing costs and place carriers and motor fuel marketers at risk of fines, delays and product seizures. Paper work and delays required for tax reconciliation reduce net tax revenue. The NFDR provides a single point of contact for registering all interstate fuel shipment diversions. NFDR encourages the timely registration of diversions and provides immediate notification to carriers, consignors and both states involved. This is a free service provided by Member States across the country.

**Application Submitted:** We are submitting this application to register for receiving FAX notifications of all fuel diversions involving our company.
